B&G report 3/14/21

1. Roof issues: gutter in back is slightly damaged. The roof tile at that spot also looks very slightly damaged and should be inspected up close. Kathy may follow up. Excess moss growing on roof; Larry and Dave might work on soon.

2. Library Ceiling painting needs re-do; Larry and Dave are following up with the AC contractor.

3. Re-open the Meeting House? The COVID rules as posted continue to apply. We'll be discussing in coming months, but for now, the old rules continue to apply about masks and distancing. Anyone wanting to be in the building should be aware of capacity limits, although this hasn't been an issue yet. As a reminder, there aren't any outside groups using our building, nor is the school (except for rare exceptions.)

4. Front yard major work has begun. Tree company plus Nancy Craft / Dave removed some trees, vines, brush, and trash along the east fence line. We're forming a re-planting subcommittee that can coordinate with the Meeting, school, and VDOT.

5. We continue to stay informed about the Joint Meeting / School Property task force issues such as the new entrance construction, need for parking, rainwater run-off, playground expansion, land title, lease of our property to the school, etc.
