B&G report 9/12/21

The committee didn't meet this month.

Lawn mowing service is done by Davey Landscaping, who the School has contracted. Our lawn will continue to look pretty shabby until we put some real effort into it, the highway / entrance work is done, and the new parking (school leading this) is installed. Our folks who are interested in landscaping have begun the next steps of planning.

We again have a new custodian service / person and Kathie G is following up. We continue to coordinate with the school on this.

AA has left some of their stuff and should be contacted to remove it or we'll get rid of it. There are pamphlets, coffee pots, and some supplies.

Building upgrades? We're soliciting ideas for any major work.
